Vlad Pocris

Shopify Frontend Developer · Liquid and headless Next.js

Wicklow, Ireland · vpocris@gmail.com · +353 85 872 5445 · linkedin.com/in/vladpocris · github.com/VladPocris

EU citizen · Authorised to work across the EU without sponsorship · Open to relocation within the EU

Professional Summary

Shopify frontend developer and independent contractor for a Shopify Partner agency, working across Liquid themes and headless Next.js storefronts for five live client stores. Strengths: metafield and metaobject content models, custom Online Store 2.0 sections, the Storefront and Admin GraphQL APIs and day-to-day client communication. First Class Honours BSc in Computing (TU Dublin); seeking a fully remote role.

Technical Skills

Shopify: Liquid, Online Store 2.0 sections, blocks and JSON templates, metafields and metaobjects, Storefront API, Admin GraphQL API, Search & Discovery, Shopify CLI, Theme Check

Frontend: React 19, Next.js (App Router), TypeScript, JavaScript, HTML, CSS, Tailwind CSS, responsive design, accessibility (ARIA, keyboard)

Tooling and APIs: Node.js scripting, GraphQL, Vitest, Git/GitHub, GitHub Actions, Vercel, Figma handoff

Languages: Romanian (native), English (fluent), Russian (fluent)

Professional Experience

Frontend Developer (Independent Contractor) — DOT (High Quality Digital SRL) Sep 2026 – Present

Remote · Independent contractor, project-based agreement with a Shopify Partner agency

- Delivered frontend work for five of the agency's client stores, all now live – two headless Next.js storefronts (VGR, Parflab) and three Liquid themes (Ella Cosmetic, Florentino Delure, MonManor).
- Shipped 46 merged pull requests through review by the agency lead – 33 of them on VGR in three weeks – and wrote 190+ Vitest unit tests across the two headless codebases.
- Worked directly with the VGR client day to day, clarifying requirements, walking through changes and turning feedback rounds into shipped features.

Webflow Developer & Content Creator (Freelance) — ItSpot Tallaght Computer Repairs Mar 2024 – Sep 2024

Tallaght, Dublin · Freelance

- Built and launched the business's responsive Webflow CMS website, set up so staff publish their own updates; wrote editor documentation and trained staff.

Student Intern (On-Campus Internship) — Technological University Dublin Jun 2023 – Sep 2023

Dublin · Summer internship

- Created data-tracking templates and scripted CSV exports for faculty reporting; wrote technical documentation.

Projects

VGR — Headless Shopify Storefront (DOT Client) Sep 2026

Next.js 16, React 19, TypeScript, Storefront and Admin APIs, metafields and metaobjects, Vitest | vgr.store

- Modelled editable content in metaobjects and metafields, provisioned by Node.js Admin API scripts, so the client manages videos, specifications, FAQs and the free-shipping threshold in Shopify admin.
- Implemented a comparison table and specification filters from one shared metafield model, normalised the client's spec data and worked around Search & Discovery not reindexing updated metafields; 80+ Vitest tests.
- Diagnosed a broken price-range filter as the Storefront API narrowing price bounds to the active filter; fixed it with a separate, unfiltered bounds query and a regression test.
- Developed metaobject-driven collection video carousels and a category scroller that plays only the centred clip, editable from Shopify admin.

Ella Cosmetic (SKYA) — Liquid Theme Extension (DOT Client) Sep 2026

Liquid, Eurus theme, Online Store 2.0, metaobjects and metafields, Admin API scripts | ella.md

- Extended a premium theme with 9 custom sections, 5 snippets and 15 JavaScript/CSS assets (~3.4k lines) used across 15 JSON templates, including per-range product templates and a drag, swipe and keyboard product rail.
- Created a metaobject-driven ingredient library with search and an A–Z index; redesigned the collection header.
- Modelled ingredients, badges and specifications as metaobjects and metafields; migrated legacy-site content with Admin API scripts, taking backups and verifying the result.

Parflab — Headless Perfume Store (DOT Client) Sep 2026
Next.js, TypeScript, Node.js, Shopify Admin GraphQL API | parflab.ro

- Wrote a Node.js pipeline that composites product photos into a Figma-defined template, checks geometry and publishes 2,300+ images through the Admin GraphQL API (staged uploads, media, variant association), with resumable, read-back-verified runs.
- Added consent-gated Meta Pixel tracking and first versions of seven storefront features from Figma, later integrated with Shopify by the agency lead.

Florentino Delure — Campaign Landing Page (DOT Client) Sep 2026
Liquid sections and blocks, Dawn-based theme | florentinodelure.com

- Developed the first version of a CSR campaign landing page from editor-configurable Liquid sections and blocks; the page was later extended by others.

MonManor — Theme Configuration and Localisation (DOT Client) Sep 2026
Liquid, agency base theme, locale files | monmanor.md

- Configured store templates and completed the Romanian locale to clear missing translations.

CivPlayers Civ3 League (Independent Project) Sep 2025 – Oct 2025
React, TypeScript, Vite, Tailwind CSS | civplayersciv3league.com · GitHub

- Built leaderboards for 8 game modes from published Google Sheets CSV data and a team generator that evaluates every captain-draft split by Elo rating, for an online gaming community.

Education

BSc (Hons) Computing with Software Development 2022 – 2025
Technological University Dublin · **First Class Honours · GPA 3.73/4.00**

- Final-year project (individual): RenCloud, a C# video editor with a custom timeline engine and CI.

QQI Level 6 — Computer Networking and Cyber Security 2021 – 2022
Bray Institute of Further Education · **Distinction**

QQI Level 5 — Computer Systems and Networks 2020 – 2021
Bray Institute of Further Education · **Distinction**

Certifications & Training

- freeCodeCamp — Responsive Web Design Certification (2026)
- freeCodeCamp — JavaScript Certification (2026)
